Single Digit Dialling

Single Digit Dialling allows you to set up to eight speed dial numbers that can be called with the push of a button. Enter the number as you would normally dial it and then just hit that number on your touch pad to call it. You can also program your speed dial using your phone and the star code for Single Digit Dialling.

Outgoing Calls - SDD

1. On the User - Outgoing Calls menu page click SDD. The User - Speed SDD page displays.
2. Type the phone number in the Phone Number text box next to a speed dial code.
3. Type a name or description for the speed dial code in the corresponding Name text box. This name does not affect the operation of the speed dial code.
4. Save your changes. Click Apply or OK. Apply saves your changes. OK saves your changes and displays the previous page.
To exit without saving, select another page or click Cancel to display the previous page.
