## MODES OF ACCESS

Fingerprint  
PIN codes  
Bluetooth keys  
RFID tags & stickers  
Physical backup keys

## Your finger is the key.

Simply unlock your door at the touch of your finger. You'll never have to worry about lost keys. You don't even have to deal with confusing PIN codes. We're making life more convenient so you can focus on the important tasks.

## Precision and reliability at its best.

Enter your home in just a matter of seconds. The high-speed detection sensor features 2D capacitive-contact technology with 508 DPI spatial resolution that has an image capture speed of up to 2 megapixel per second. With over 3.5 million finger placements, it allows your finger to be oriented in any direction and still authenticate it.

## A smart complement to the modern lifestyle.

Be it for holidays, work trips, or even just out to run errands, you may have guests to let in at any point in time. Set the duration of PIN codes and Bluetooth keys to give access to your property, and also ensure it's kept secure after they leave.

## Convenience on the go.

All igloohome devices work with the igloohome mobile app so you can manage access in the palm of your hands.

Customise the validity of your PIN codes and Bluetooth keys for different guests. There's no need for you to be near the lock to do so. The innovative algoPIN™ technology lets you remotely grant access anytime, anywhere.

## Syncs with Airbnb.

If you're an Airbnb host, simply synchronise your listing calendar with your igloohome account to automatically create and send PIN codes for each guest.

### TYPES OF PIN CODES

One-Time  
Permanent  
Recurring  
Duration

## Keep the wrong ones out

### Security lockdown

Keypad is disabled after several incorrect PIN code attempts.

### Masking security code

Conceal your actual PIN code by entering random digits before it.

### Tamper Alarm

Alarm will sound if intruders try to pry the lock from the door.

### Intrusion Alarm

Alarm will sound if intruders force open the door while the bolt is still locked.

## Protect your loved ones

### Fire alarm

The Mortise unlocks when it detects high temperature from inside.

### Auto relock

The Mortise automatically relocks once the door is closed.

### Panic exit system

Swiftly exit during emergencies with a simple push of the handle.

## The ultimate keyless experience

### Passage mode

Turn auto relock off for greater convenience when needed.

### Low battery alert

Prompts you intuitively to replace the batteries before they run out.

### Volume control

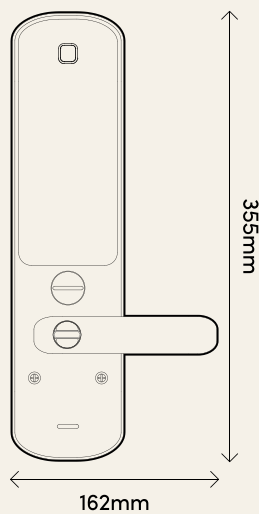

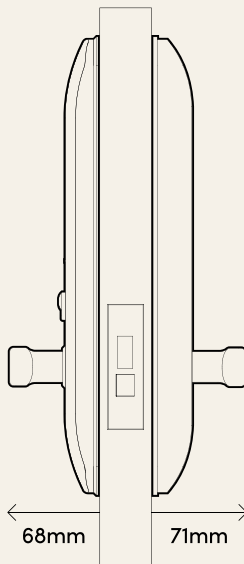

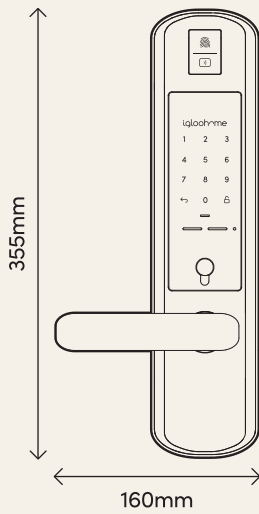

Adjust the volume to suit your preferences.

### 9V Battery Emergency jumpstart

Jumpstart with a 9V battery if batteries are drained.
