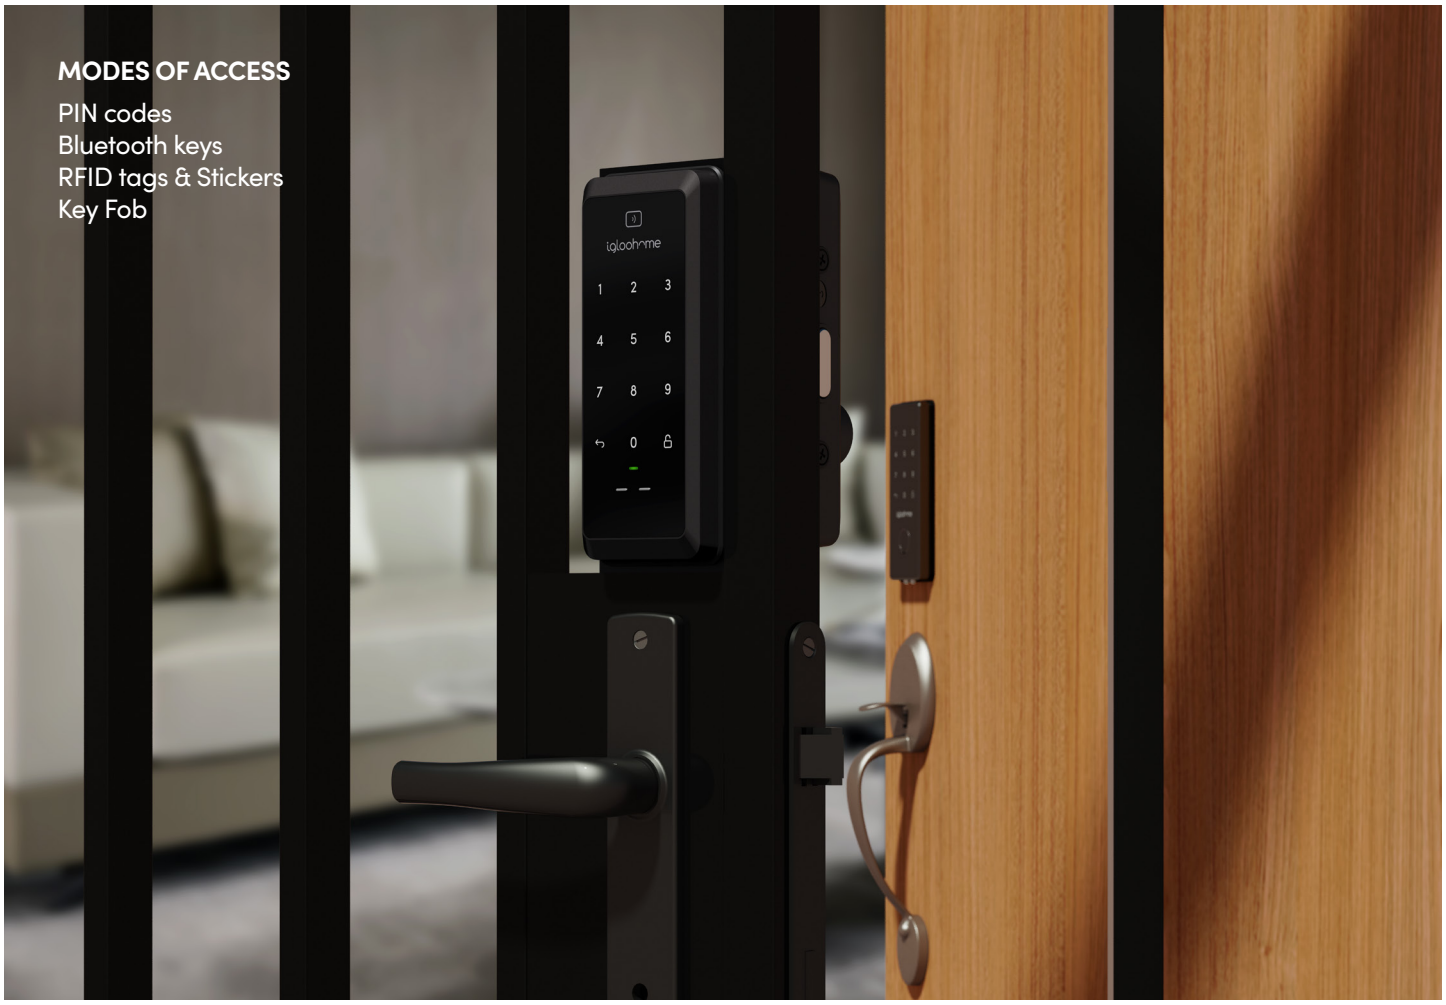
The perfect companion for your igloohome smart door lock.

Designed as an added layer of security for your home, the Rim Lock is built for metal gates to ensure your property is secure at all times. Now you can enjoy greater peace of mind without compromising convenience. We've got your home's entrance covered.



Complements your smart door lock

Up the ante on your home's security with the Rim Lock. Smart locks aren't just for main doors, your metal gate can now be smart too. You can be assured that your home is kept safe and secure for the ones you love.

Smarter living

Life's simpler when you live smarter. Coupled with the igloohome key fob, the Rim Lock unlocks with just a press of the button. No more fussing with multiple keys or having an unlocked gate.

Go completely keyless

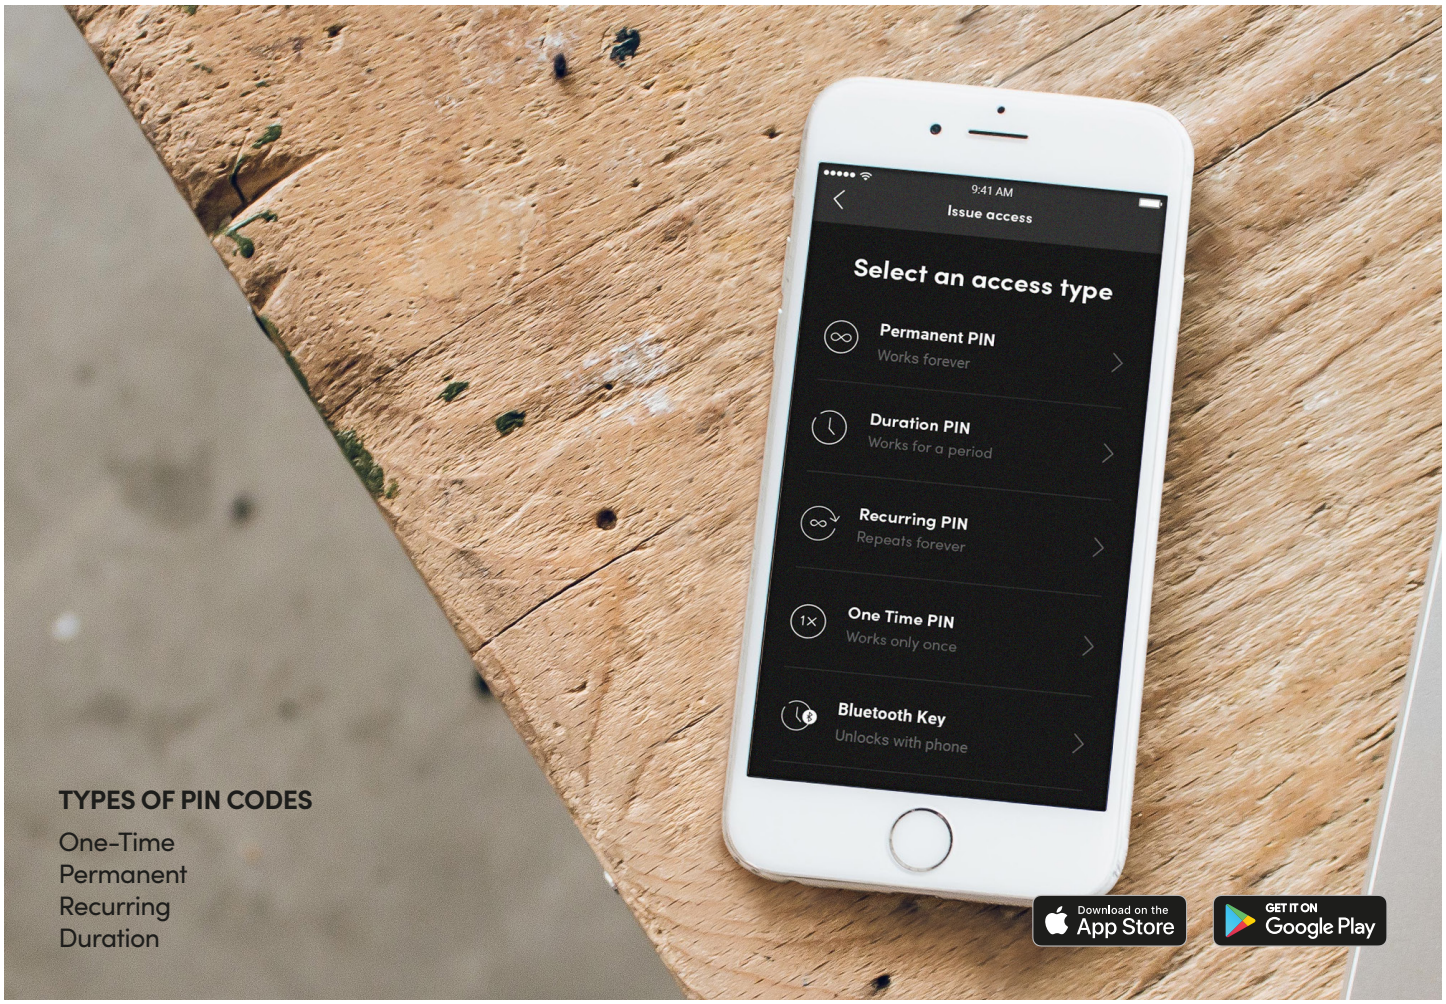
All igloohome devices work with the igloohome mobile app so you can manage access at your fingertips.

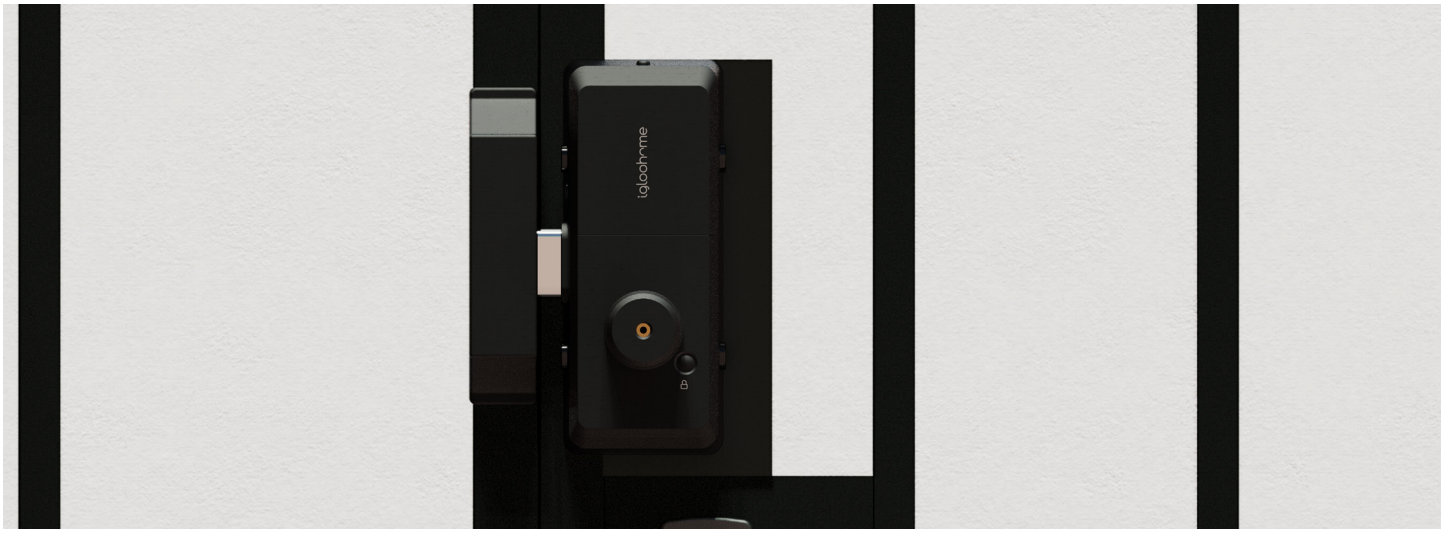
Customise the validity of your PIN codes and Bluetooth keys for different guests. There's no need for you to be near the lock to do so. Our unique algoPIN™ technology lets you remotely grant access anytime, anywhere.

**Note: PIN code activity logs are updated when the lock is synced in Bluetooth range with the app.*

Syncs with Airbnb

If you're an Airbnb host, simply synchronise your listing calendar with your igloohome account to automatically create and send PIN codes for each guest.





Never worry about security

Security lockout
Access is disabled after several incorrect entries to ensure your property is always secure.

Masking security code
Heighten security and throw off onlookers by entering random digits before your actual PIN code.

Keypad disabled mode
Disable the keypad to prevent unwanted PIN code entry.

Auto relock
Automatically relocks once the door is shut to give you a greater peace of mind.

Always one step ahead

Tamper alarm
The Rim Lock will sound an alarm if it's pried from the door to alert and deter potential tampering attempts.

**Note: Alarm is triggered when cable is cut.*

Fire alarm
The lock will unlock automatically when its sensors detect high temperatures from inside the property.

Low battery alert
An intuitive audio and LED visual alert will prompt you to change the batteries when it runs low.

Emergency jumpstart
Easily jumpstart the Rim Lock with a 9V battery as an emergency measure if batteries are drained.

Value-adding to your home

Passage mode
Turn auto relock off via Bluetooth or the Multi-Function Button for easier access if needed.

Obstruction alarm
The lock will sound an alarm if the bolt tongue cannot be extended or retracted fully to alert the user of any obstructions.

Volume control
Adjust the volume according to your preference. Select from levels 0 (mute) to 5 (loudest).
