

Conversion of Home Digital Line on Router to Optical Network Terminal (For Fibre Recontract Customers with existing Home Digital Line)

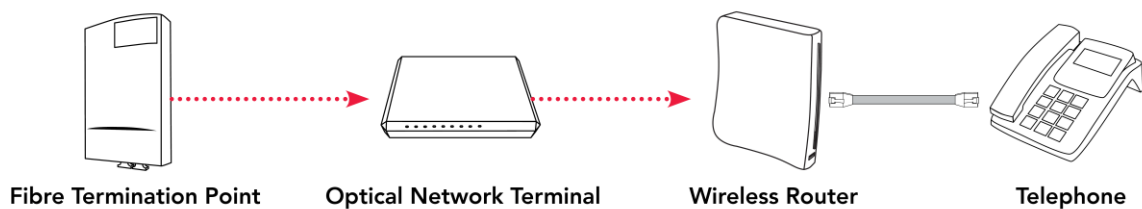

Eligible Conversion Date:

(Your re-contract date)

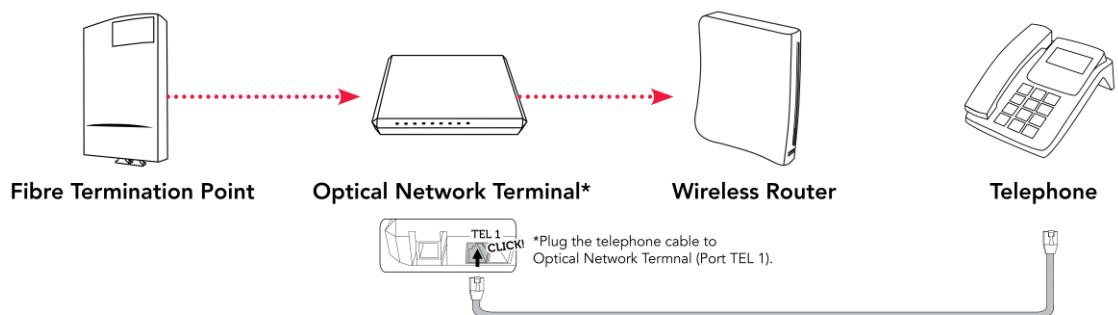

Guide for existing Home Digital Line users

If your current home telephone line is connected to a Singtel issued router as per Diagram A and has no dial tone, you are required to follow the step-by-step instructions below to pair your telephone service with your Optical Network Terminal, shown in Diagram B.

A. Current configuration

B. Optimal configuration
