1. 1GB = 1 billion bytes; actual formatted capacity less.

2. Size and weight vary by configuration and manufacturing process.

3. Data plan is required. 4G LTE Advanced, 4G LTE and VoLTE are available in selected markets and through selected carriers. Speeds are based on theoretical throughput and vary based on site conditions and carrier. For details on 4G LTE support, contact your carrier and see [www.apple.com/iphone/LTE](#).

4. FaceTime calling requires a FaceTime-enabled device for the caller and recipient, and a Wi-Fi connection. Availability over a mobile network depends on carrier policies; data charges may apply.

5. Siri may not be available in all languages or in all areas, and features may vary by area. Internet access is required. Mobile data charges may apply.

6. All battery claims depend on network configuration and many other factors; actual results will vary. Battery has limited recharge cycles and may eventually need to be replaced by an Apple service provider. Battery life and charge cycles vary by use and settings. See [www.apple.com/batteries](#) and [www.apple.com/iphone/battery.html](#) for more information.
